Yassel Omar Izquierdo Souchay

Fullstack Developer | AI-Agent Assisted Development | Healthcare & Government Systems

Posadas, Misiones, Argentina | me@yoisar.com | sioy23@gmail.com | +54 9 3764 62-4361
linkedin.com/in/yoisar | github.com/yoisar | yoisar.com

Professional Profile

Over 25 years of experience in IT systems, combining fullstack development, software architecture and tech entrepreneurship. I work with AI agents: written requirement, batch implementation, verification with automated tests, and a report per batch. I take healthcare and government systems (RISMI, Misiones Government House), my own SaaS products (Clerk AI, Distriboo, Ventarifas) and my own online stores (YOIS Snacks, YOIS Helados) to production. I want to join a team that builds products with AI.

Professional Experience

Fullstack Developer – Document Management (CGM)

Misiones Government House | Misiones, Argentina
2026 – Present

- Intake and case-file system built with **microservices** (authentication and permissions, intake, case files) with a frontend.
- Images are built automatically and the server only pulls them.
- Sequential case-file numbering per agency and year with locking, no duplicates; A4 cover sheet that replicates the physical form.
- Import of 427 agency codes with preview and audit trail; continuous evolution by versions.
- Every requirement is documented in writing; verification with automated tests, type checking and an automated browser, with a report per delivery.

Software Developer – Healthcare Systems (RISMI)

Hospital Dr. Ramón Madariaga | Posadas, Misiones, Argentina
2022 – Present

- **Pathology (2026)**: migration of the pathology system (more than 350,000 historical studies across 8 types) to an application inside RISMI, with single sign-on, roles, auditing and navigation from the platform, and functional parity with the old system, reports included.
- Pathology is delivered in batches, with a technical report per batch and QA with the user area; more than 150 automated tests. Currently in development.
- Anesthesiologist Module (RISMI v2), digitizing anesthetic procedure management.
- Maintenance of the Vaccination Module (RISMI v2) and the Inventory System (RISMI v1).
- Notifications module (RISMI v1) with personalized delivery, automated alerts and event tracking.
- Refactoring of legacy code in RISMI v1: readability, maintainability and performance.

Fullstack Developer – Tourism Projects

Guajira Viajes & PorElCaribe | Argentina
2026 – Present

- Modernization and maintenance of the Guajira Viajes and PorElCaribe tourism platforms: frontend, business logic and an admin panel for content, packages and inquiries.
- Cruise module with a dedicated landing page; fixed-rate installment financing in ARS with bank agreements.
- Staging environments for development and testing: front.guajira.dev.yoisar.com and porelcaribe.dev.yoisar.com.

Independent Fullstack Developer & Entrepreneur

Own products | Argentina
2025 – Present

- **Clerk AI** – Own conversational assistant SaaS that answers with each business's information, with an admin panel, plans, payments and licensing. Automated end-to-end tests.
- **Distriboo** – B2B SaaS for wholesale distribution: 4-level pricing engine, 24/7 online ordering, zone-based logistics, CSV/Excel import, roles and subscription plans.
- **Ventarifas** – Online raffles marketplace: automatic numbers, secure payments and a real-time panel.
- **YOIS Snacks** (yoissnacks.com) – Own online store for protein snacks that I design and run: points and rewards, referrals, virtual balance and credit, pickup points, a reseller network with tiered commissions and a management panel with indicators.
- **YOIS Helados** (helados.yoissnacks.com) – Own online store for protein ice cream: pack builder with volume discounts, product comparison, smart selector, subscription and wholesale sales.
- **Fideliza** – Platform for merchants: catalog, points, referrals and raffles.

Technologies & Tools

Languages	PHP (5.2 to modern), JavaScript, TypeScript
Frameworks	Laravel, Symfony, Vue.js, Next.js, React, React Native
Databases	MySQL, PostgreSQL (pgvector)
AI	Claude Code and AI agents, GitHub Copilot, RAG (embeddings, pgvector), repository rules in AGENTS.md
Quality	Vitest, Cypress, Playwright, PHPUnit, ESLint
Infrastructure	Docker, CI/CD, nginx, Let's Encrypt, Linux VPS
Version control	Git, GitFlow, GitLab
Management	Kanboard

Featured Projects

Project	Description
Clerk AI	Own conversational assistant SaaS for businesses, with panel, plans and licensing. clerk.yoisar.com
CGM	Document management for the Misiones Government House: intake and case files.
Pathology (Madariaga Hospital)	Madariaga Hospital pathology application, inside RISMI. Currently in development.
Guajira Viajes	Travel agency with packages, cruises and installment financing.
PorElCaribe	Tourism in Caribbean destinations.
Distriboo	B2B SaaS for wholesale distribution. distriboo.yoisar.com
Ventarifas	Online raffles marketplace. ventarifas.com
YOIS Snacks	Own online protein snack store, with points, referrals and resellers. yoissnacks.com
YOIS Helados	Own online protein ice cream store, with packs, comparison and subscription. helados.yoissnacks.com
